Portfolio

Objective

Results-driven Software Engineer with 7 years of experience in backend development, including 2 years of freelance projects. Skilled in designing and optimizing scalable, secure, and high-performance applications using modern technologies such as NestJs and Laravel. Adept at tackling complex backend challenges, improving system architecture, and delivering impactful software solutions. Seeking to contribute expertise and innovation to a forward-thinking team while continuing to grow professionally.

Professional Experience

11/2024 – Present
Cairo, Egypt

Backend Developer - Full time (Remote), Robusta Technology Group

- Developed and maintained scalable Laravel applications, leveraging Spatie packages (permissions, activity log) and Filament to build efficient admin dashboards and backend systems.
- Designed and optimized relational databases (MySQL/PostgreSQL), creating well-structured schemas and writing complex queries for improved performance.
- Collaborated with Product, Frontend, and DevOps teams
- Participated in sprint planning, estimations, and code reviews
- using Laravel Forge/Envoyer and troubleshoot server-side issues.
- Built RESTful APIs with Laravel Sanctum/Passport for secure integration with frontend apps and third-party services.
- Leveraged AI-powered development tools, including Cursor and the Model Context Protocol (MCP), to accelerate development, improve code quality, write unit tests, and produce robust documentation.
- Used AI tools to assist in system design and debug complex issues, enhancing overall team efficiency.
- Supported team growth by mentoring junior developers on Laravel, Eloquent optimization, and package integration.

07/2024 – 11/2024
Kuwait

Backend Developer - Part Time, Almasa

As the backend team leader, I directed the development of a scalable internal e-commerce platform using domain-oriented architecture. I led the team in creating essential features, optimizing performance, and integrating payment systems seamlessly.

- Led the backend team in developing an internal e-commerce dashboard and mobile app API using laravel.
- Implemented domain-oriented architecture to enhance system scalability and maintainability Developed API features, including real-time chat functionality, to enhance user interaction and engagement.
- Integrated SadadPay payment gateway for secure and efficient payment processing.
- Implemented a notification system to streamline communication and improve user experience.
- Ensured scalability, security, and performance optimization for the company's internal e-commerce product.

01/2022 – 01/2024
Al Dakahlia, Egypt

Backend Developer - Full time, Codebase-tech

Over a two-year period, I contributed to the entire software development lifecycle (SDLC) of multiple complex projects, from architecture design to deployment, with a focus on backend development using PHP/Laravel and MySQL.

- Designed scalable, secure, and high-performance systems.
- Integrated third-party APIs and optimized databases for high-traffic efficiency.
- Resolved performance bottlenecks and managed complex system integrations.
- Collaborated with cross-functional teams to deliver reliable, on-time solutions.
- Contributed to technical decision-making for maintainable and efficient architectures.

09/2021 – 12/2021
Al Dakahlia, Egypt

Backend Developer - Internship, Waitbuzz

- Contributed to backend architecture design, ensuring seamless functionality and scalability.
- Optimized performance throughout the development lifecycle to meet production standards.
- Collaborated closely with senior developers to refine skills and deliver high-quality, productionready solutions.

05/2019 – 09/2021

Software Engineer, Freelance

Kickstarted my professional engineering journey by delivering custom backend solutions for small to medium-sized projects. Gained intensive, practical experience developing with PHP, prioritizing clean code execution and direct client communication to solve practical business problems and establish a strong technical baseline.

Selected Project

Egypt Innovate

Elsafwa Resort

Fitexpert

Circles Academy

Itrainer

Education

07/2019 – 07/2023
Mansoura, Egypt

Bachelor of Computer Technology and Commercial Sciences,
Nile Higher Institute

Awards

01/07/2022

Won Best Arabic App & Best Social Impact Awards In Apps Up 2022 Huawei Global App Innovation For the "Us and Them" App, Huawei

Concepts

- Algorithms
- Data Structure
- Design Patterns
- Computer Architecture
- Software Architecture
- System Design
- SOLID
- Cache Strategies
- Containerization
- Microservices
- Event Driven Architecture
- DDD
- MCP
- TDD
- Distributed Systems
- Database Replication
- System Observability
- Horizontal & Vertical Scaling

Technologies

- PHP (Expert)
- Laravel (Expert)
- Javascript (Proficient)
- MySql (Expert)
- PostgreSql (Competent)
- NodeJs (Competent)
- NestJs (Competent)
- Html & Css (Competent)
- Python (Amateur)
- MongoDB (Amateur)
- VueJs (Beginner)
- C++ (Beginner)
